Subject: FW: Conceptual Plan Review for the Eastman and North Pleasant

Dear Guilford,

I am writing in response to your phone call of today, May 19th, regarding the Design Review Board's comments on the intersection at Eastman Lane and North Pleasant Street.

I sent these two emails, dated April 27 and April 30, (see below) to the Design Review Board members regarding the Eastman Lane/North Pleasant Street intersection, notifying them of the public hearing on the intersection and asking them if they wished to meet as a group to comment on the conceptual design.

As you know Design Review Board member, Jim Wald, attended the Public Works Committee meeting on May 4th. Mr. Wald and I reported on the public hearing to the Design Review Board at the May 18th DRB meeting.

Design Review Board members commented on the conceptual plan as follows:

- 1) Landscape Plan – Once a Landscape Plan has been prepared, the DRB would like to have an opportunity to review and comment on it.
- 2) Lighting Plan – Once a Lighting Plan has been prepared, the DRB would like to have an opportunity to review and comment on it.
- 3) Materials – Once materials have been selected for the crosswalks and “traffic tables” the DRB would like to have an opportunity to review and comment on them.

When these plans have been prepared, please let me know where they can be viewed, or send me a copy. Then Planning Department staff can meet with the DRB to review them and pass along the DRB's comments to the DPW.

Chris Brestrup
